

Validation of Formal, Non Formal and Informal Learning for Administration Personnel through Asynchronous Electronic Learning and Online Assessment

2nd Newsletter, May 2023

The Project

E-EUPA – “*Validation of Formal, Non Formal and Informal Learning for Administration Personnel through Asynchronous Electronic Learning and Online Assessment*” aims to deliver state of the art asynchronous eLearning for the development of the knowledge, skills and competences identified in the qualification framework developed by the previous project. E-EUPA is a project co-funded by the European Union through the Erasmus + programme.

The aim of e-EUPA is to provide an alternative method for learning and certification for administration personnel in four different EQF levels.

Objectives

The objectives of e-EUPA are the following:

1. To develop a methodology based on key success factors for the conversion of traditional classroom training materials into asynchronous e-learning;
2. To use this methodology to convert all the methodological tools of the previous projects (EUPA and EUPA Next);
3. To develop state of the art lectures that are not merely PowerPoints in pdf but streamed with the video recording of the trainer's.
4. To develop a platform to get trained in different EUPA levels;
5. To develop online assessments certificated with ISO17024 in four different levels for the learners that want to be certificated in EUPA;
6. To train the trainers on the use of the asynchronous electronic learning method;
7. To sensitize the trainers on the importance of digitalization in education;
8. To support the VET providers in their internationalization, recognizing that asynchronous e-learning provides huge opportunities for international offerings in vocational training;
9. To provide the e-EUPA offering to the commonly used languages of Europe so that we can ensure great impact of our results.

Project Updates

In January, MMC hosted a two-day meeting in Nicosia (Cyprus) to discuss the transformation of all materials from synchronous to asynchronous learning materials, as well as the certification schemes and the current stage of the project. This face-to-face meeting allowed partners to collaborate effectively and develop a solid plan for the upcoming tasks.

Project Result 1 - Methodological Framework for the Conversion of Training Materials in Asynchronous Electronic Learning Materials

The Framework is now finalized as the “Methodological Framework of Guidelines for the Transformation of the Material”. The goal of e-EUPA is to provide an alternative method of learning and certification for administrative staff on four different EQF levels.

Work in progress

Project Result 2 - Two Certification Schemes

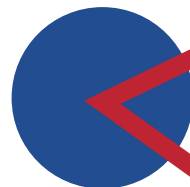

Project Result 3 - Updated EUPA Materials for Asynchronous Electronic Learning

Project Result 4 - Video Recorded Lectures for Asynchronous Elearning

e-EUPA partnership has been actively working over the past few months on:

- Merging some of the e-EUPA units so that the programme is easier to manage and navigate. This change will make the materials more user-friendly and will enhance the learning experience for the users.
- Expanding the e-EUPA unit on Health & Safety to respond to the new challenges caused by the Covid-19 pandemic.
- Adding a new unit on environmental issues with emphasis on circular economy.
- Converting the methodological tools to tools that can be implemented through asynchronous electronic learning. This change will allow learners to access our materials at their own pace and on their own schedule, which will enhance their overall learning experience.
- Recertifying the e-EUPA materials.
- Translating the e-EUPA materials to the new languages of the consortium. The aim is to be able to deliver translations to some of the main languages of the EU, including English, German, Spanish, Italian and Greek.
- Developing a template for the eEUPA video recorded lectures.

Online workshops and meetings

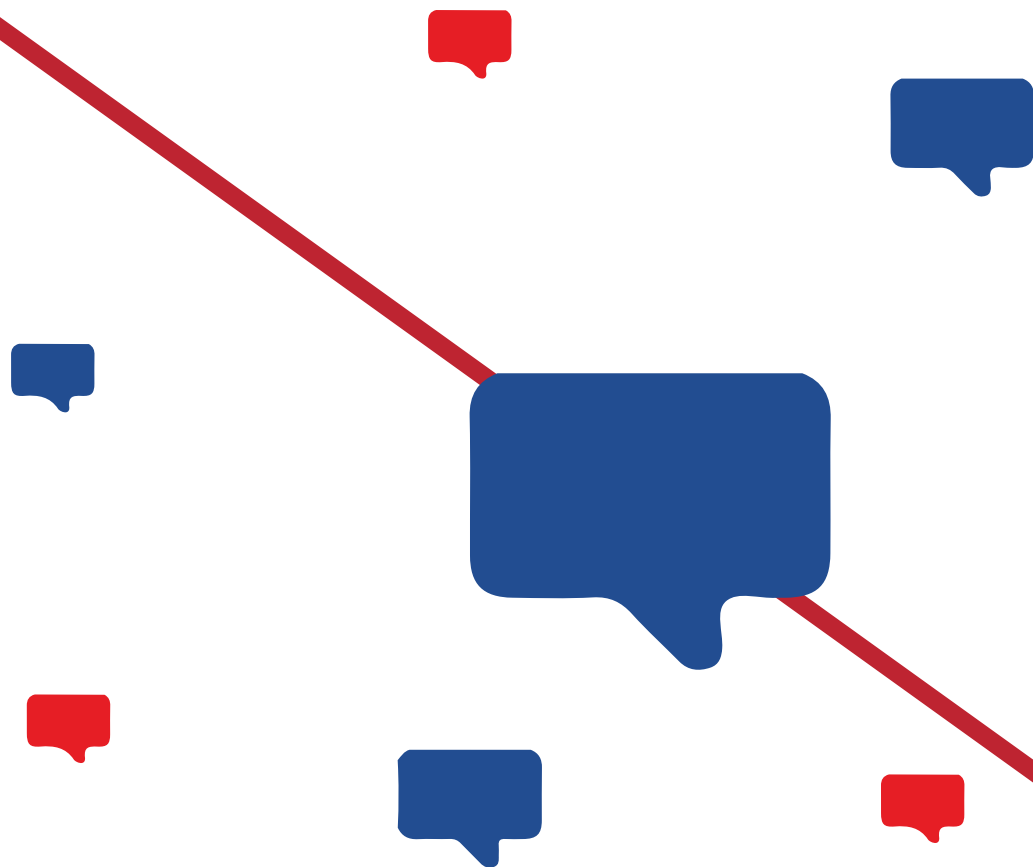

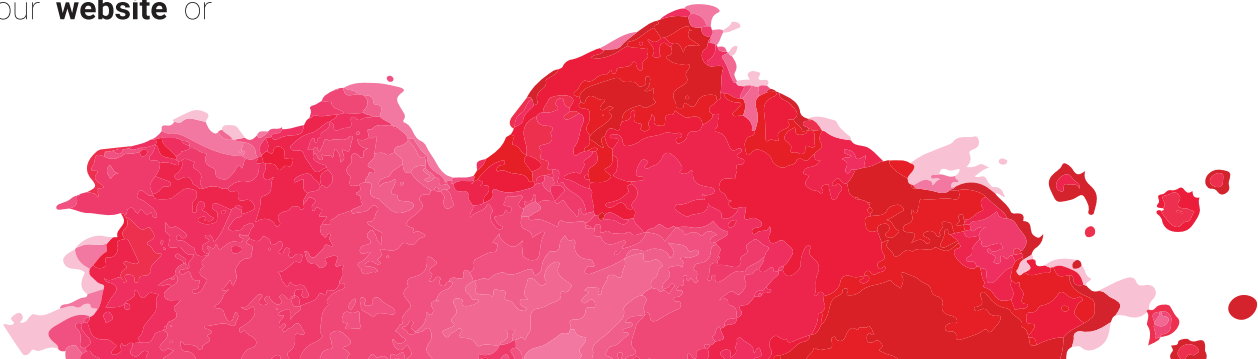

Throughout the project, the partnership has been meeting online on a regular basis to review the project progress and collaborate on the project results. During these workshops, the partners engaged in brainstorming sessions to plan and organize their work. They focused on reviewing all units from EUPA_NEXT to make them more suitable for e-EUPA, drafting potential new Health and Safety units, planning the transformation of materials into asynchronous learning materials, and reviewing the two certification schemes.

Upcoming meetings

- Partners' meeting (online): 25th May 2023
- Transnational Project Meeting (face-to-face): September 2023, Málaga, Spain
- Partners' workshop (face-to-face): September 2023, Malaga, Spain

Stay tuned!
