Dealing with unpredictable changes

“Uncertainty and change are the only predictable factors for businesses in a world where once-stable regimes fall within weeks, and supposedly strong organisations and economies collapse unexpectedly. You cannot predict the future but you can prepare for it.”

Mercury Urval

How to solve a problem

There are four basic steps in solving a problem:

1. Defining the problem and its roots
2. Generating alternatives
3. Evaluating and selecting alternatives
4. Implementing solutions

Business Process Reengineering Cycle

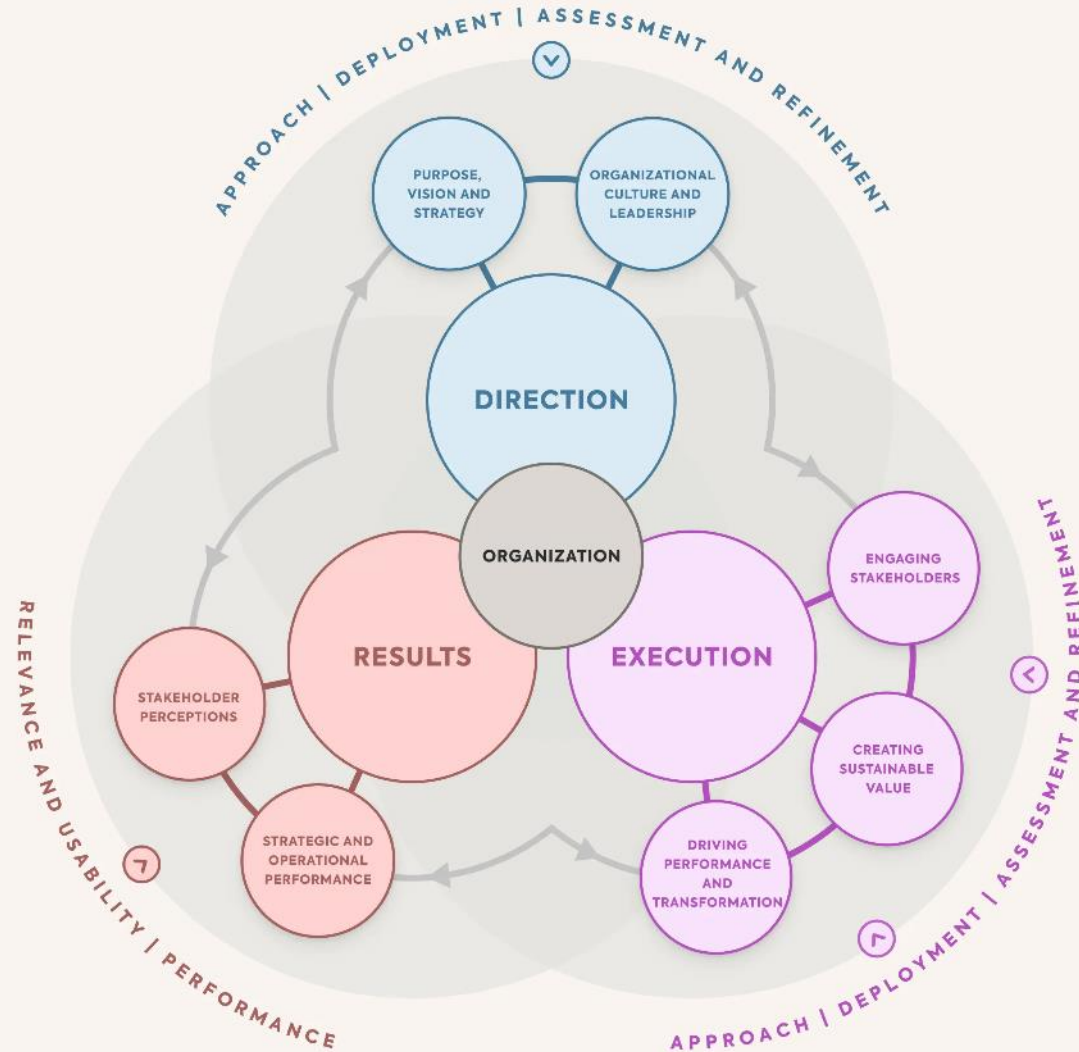

Business Process Reengineering is a dramatic change initiative that contains five major steps, namely:

- Refocus company values on customer needs
- Redesign core processes
- Reorganize a business into cross-functional teams with end-to-end responsibility for a process
- Rethink basic organizational and people issues
- Improve business processes across the organization

QM concept

EFQM Excellence Model

RADAR logic – a continuous improvement cycle used by EFQM:

- Determine the **R**esults expected to be achieved through the strategy
- Plan and develop a set of **A**pproaches to deliver the required results now and in the future
- **D**eploy the approaches in a systematic way
- **A**ssess and
- **R**efine the deployed approaches based on monitoring and analysis of the results achieved

5 Whys method

a series of five “why” questions relating to
a failure

- **Example of 5 whys:**

- ▪ Why did the customer provide negative feedback for the X product?
 - ▪ Because the delivery was late
 - ▪ Why was the delivery late?
 - ▪ Because there was a problem with issuing the invoice
 - ▪ Why was there a problem with invoicing?
 - ▪ Because the person responsible was on leave
 - ▪ Why were they not substituted?
 - ▪ Because the department is understaffed
 - Why is that? ←

- **ROOT PROBLEM: personnel shortage in the department!** ←

Six Sigma follows the **DMAIC** methodology:

- **Define**
- **Measure**
- **Analyse**
- **Improve**
- **Control**

First things first! Decide **WHAT** to measure:

- Focus on key business drivers
- Find your specific measures (*e.g. customer service*)
- Use standardised measures
- Choose and use key performance indicators (KPIs)

WHAT?

Selecting KPIs

KPIs shall be:

- Linked to the top-level goals of the organisation
- Quantifiable
- Controllable

- Key Performance Indicators (revenue, conversion rate, customer satisfaction and retention rate)
- Feedbacks and surveys
- Project management tools

Team performance planning

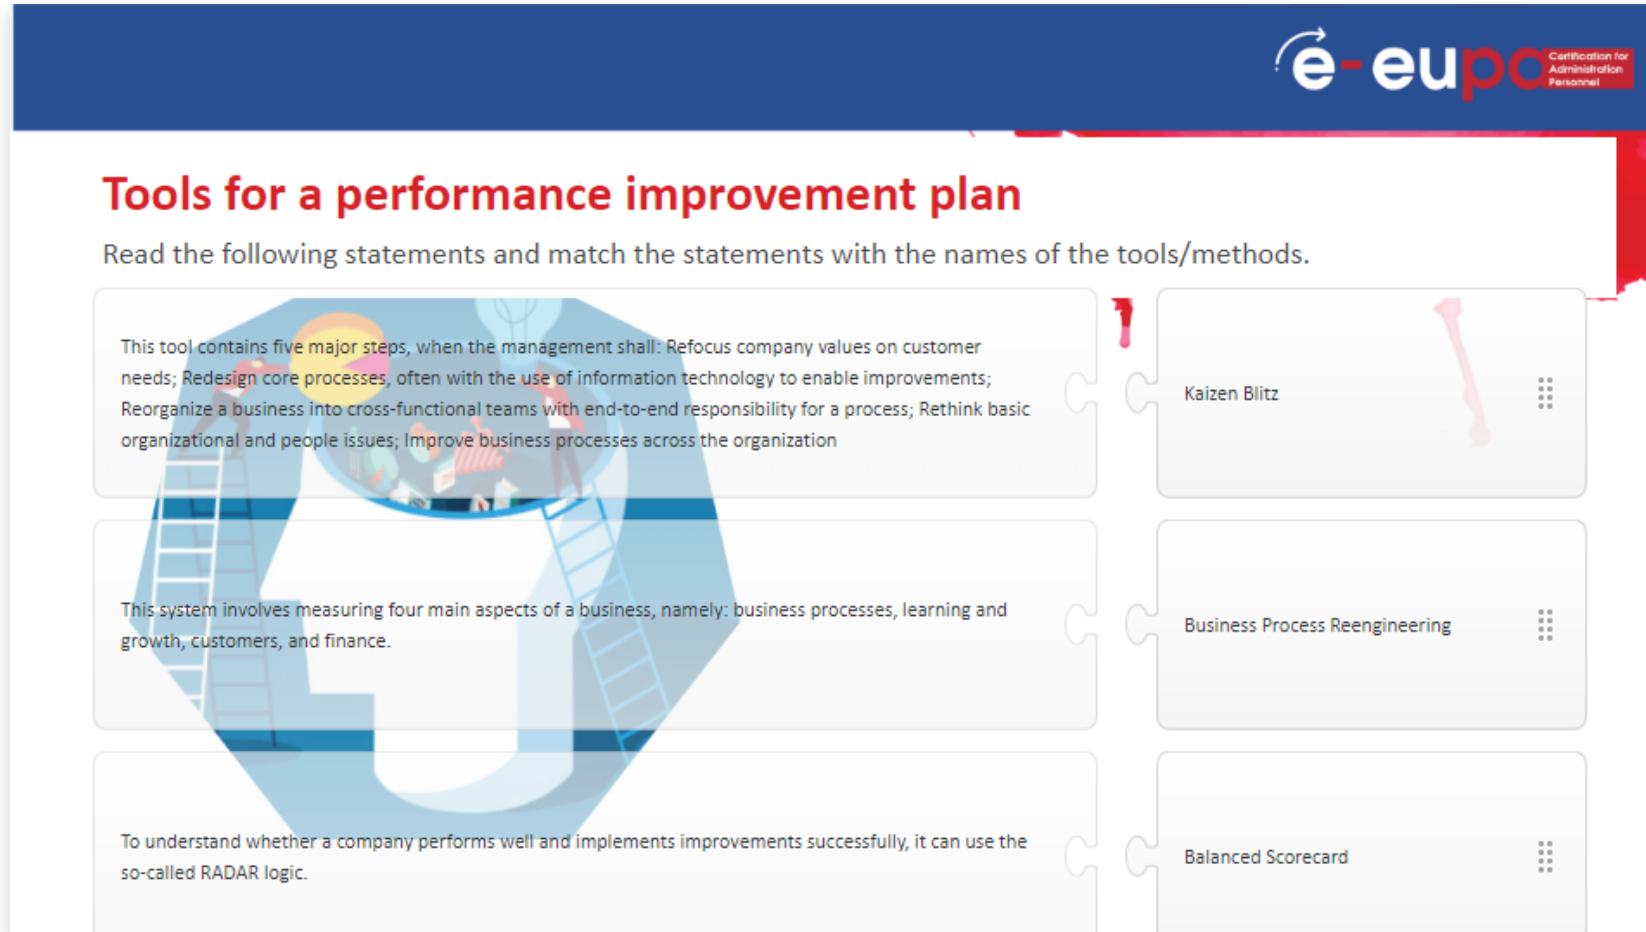

GOALS:

- Identify the desired performance levels of the team
- Identify how these performance levels will be achieved
- Provide guidance and direction to the team
- Measure progress towards the desired performance levels

The screenshot shows a quiz interface with a blue header containing the 'e-eupo' logo and the text 'Certification for Administration Personnel'. The main title is 'Tools for a performance improvement plan' in red. Below the title is the instruction: 'Read the following statements and match the statements with the names of the tools/methods.' The quiz consists of three statements on the left and three tool names on the right, each in a puzzle-piece style box. The first statement is partially obscured by a large blue puzzle-piece graphic.

Tools for a performance improvement plan

Read the following statements and match the statements with the names of the tools/methods.

This tool contains five major steps, when the management shall: Refocus company values on customer needs; Redesign core processes, often with the use of information technology to enable improvements; Reorganize a business into cross-functional teams with end-to-end responsibility for a process; Rethink basic organizational and people issues; Improve business processes across the organization	Kaizen Blitz
This system involves measuring four main aspects of a business, namely: business processes, learning and growth, customers, and finance.	Business Process Reengineering
To understand whether a company performs well and implements improvements successfully, it can use the so-called RADAR logic.	Balanced Scorecard

Mentoring vs. coaching:

- Coaching is short-term – mentoring is long-term.
- Coaching is task-oriented – mentoring is relationship-oriented.
- Coaching is performance-driven – mentoring is development-driven.
- Coaching does not require design – mentoring requires a design phase.

**When is coaching appropriate?
When is mentoring a better alternative?**

"A mentor is someone who sees more talent and ability within you, than you see in yourself, and helps bring it out of you."

Bob Proctor
