

2ND PRESS RELEASE

E-EUPA: Website Launch, Framework Development, and Next Steps

July 17th, 2023

The E-EUPA project is taking important steps to improve digital learning in vocational education and training. A key milestone is the launch of the E-EUPA project website (<https://e-eupa.projectsgallery.eu/>), which provides information, resources, and updates on the project's progress. At the same time, the project has developed a comprehensive framework to transform the existing EUPA NEXT training materials into asynchronous e-learning content. This means that learners will be able to study at their own pace, making training more flexible and accessible.

The next phase of the project will focus on adapting and testing the newly developed materials to make sure they are effective and easy to use. The materials will be tested in real learning environments before being finalized. Once completed, they will be available in English (EN), Spanish (ES), Greek (EL), and Italian (IT), ensuring that learners from all partner countries can benefit. By making these resources digital and accessible, the E-EUPA project aims to support learners in gaining important skills in a modern and flexible way.
